PERSONAL ALCOHOL DETECTOR

Assist's you in identifying your level of alcohol consumed!

In UK, the alcohol legal limit is : 0.80g Per one litre of blood (so It is 0.35 mg of alcohol per 1 litre of breathe. This is «about» 2 glasses of alcohol, however, nothing assists motorists to become aware when they have consumed.

The SafeDrive product, is designed to be used as a reference: This allows the driver to realize his/her physical condition and assists him/her to act in a responsible manner.

The Safedrive uses the innovative MEMS (Micro Electro Mechanical System) Gas Sensor. You need to blow into the inhaler and it will detect the percentage of the alcohol in your breath. A clear and precise number will appear.

- Personal ALCOHOL DETECTOR SafeDrive deluxe
- Sensor Type: MEMS Semiconductor Gas Sensor
- Power source: Two AAA batteries
- Battery life: More than 150 measurement
- Dimensions: 90 x 30 x 17mm
- Weight: 43g including batteries
