

# INFORAD V4e

driving road safety ■■■

## The best of the V3 with extra power

The **INFORAD V4e** is based on the elegant **V3** design but is powered by the latest SiRFStar III chipset and a more powerful built-in antenna able to capture GPS signals through athermic/UV coated windscreens. As a result there is no need for an external antenna.

The **V4e** comes complete with a magic carpet gel pad for simple dashboard fitting, a power cable that also doubles as a USB connector to your PC, a cigarette lighter power adaptor and a comprehensive user guide and lifetime subscription. Comprehensive user guide and lifetime database subscription included.
